AHSAN NAWAZ

CLOUD & DEVOPS ENGINEER

Karachi, Pakistan | +92 332 888 9799 | productsbyahsan@gmail.com

linkedin.com/in/ahsannz | ahsan2000.github.io/portfolio/

PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 4+ years of production experience across banking, multi-cloud infrastructure, and application delivery. Operated Kubernetes clusters spanning 150+ nodes and designed digital banking backend and live AI chatbot infrastructure. Hands-on experience with AWS, Azure, Google Cloud, Terraform, CI/CD, GitOps, Linux, and observability.

TECHNICAL SKILLS

Cloud: AWS, Azure, GCP; EC2, ECS, RDS, IAM, Route 53, CloudFront, Lambda; AKS, App Service, virtual machines, Log Analytics, private networking

Containers: Kubernetes, EKS, AKS, GKE (freelance), Docker, Docker Swarm, Helm, NGINX Ingress, MetalLB, Longhorn

Delivery & automation: Jenkins, Bitbucket Pipelines, Argo CD, GitLab, GitOps (staging), Git, Terraform, Ansible, AWS CDK, CloudFormation

Operations: Linux, Windows Server, networking, disaster recovery, Prometheus, Grafana, ELK/EFK, centralized logging

Scripting & quality: Python; Bash for health checks, backups, infrastructure setup; PowerShell, Batch, SonarQube, Trivy, Playwright

Data & messaging: MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ; database setup, users, migrations, backup/restore

AI platforms: Ollama, retrieval-augmented generation (RAG), Microsoft Foundry; DigiMate chatbot project

PROFESSIONAL EXPERIENCE

Bank AL Habib Limited | DevOps Engineer

Karachi, Pakistan | May 2025 - Present

- Designed digital banking backend infrastructure for a bank serving 2 million+ customers, using Kubernetes for microservices, ELK for centralized logging, and RabbitMQ for asynchronous messaging.
- Designed and deployed the live DigiMate AI chatbot infrastructure on Azure, covering AKS, virtual machines, App Service, MongoDB clusters, Redis, Log Analytics workspaces, and private networking; isolated banking and chatbot backends and configured HTTPS/TLS.
- Set up retrieval-augmented generation (RAG) and model configuration in Microsoft Foundry for DigiMate; worked with Ollama within the chatbot project.
- Installed NGINX Ingress, MetalLB, Prometheus, and Longhorn on Kubernetes using Helm. Implemented GitOps delivery in staging with GitLab and Argo CD, synchronizing committed image-tag changes to cluster deployments.
- Implemented a secondary Kubernetes cluster and database replication for disaster recovery; validated application connectivity, login, and transaction flows during failover testing. Configured Prometheus/Grafana dashboards, alerts, and notifications.
- Restored Kubernetes worker connectivity by correcting private-network DNS configuration; mentored colleagues in troubleshooting and resolving technical errors.

PROFESSIONAL EXPERIENCE (CONTINUED)

TekRevol | DevOps Engineer

Karachi, Pakistan | May 2024 - May 2025

- Provisioned client production infrastructure on AWS using Terraform, including EC2 instances, load balancers, and S3 buckets.
- Automated nightly MongoDB/PostgreSQL backups to S3 using cron; restored and validated MongoDB, PostgreSQL, and Amazon RDS backups. Provisioned database servers, created users, and performed migrations.
- Scripted SonarQube/Trivy security gates to block vulnerable staging releases; managed least-privilege AWS IAM and mentored colleagues in troubleshooting and correcting technical errors.
- Automated previously manual website releases using Jenkins builds, S3 artifact storage, and Ansible to deploy artifacts and install Node.js dependencies on EC2.

Teresol Pvt. Ltd. | DevOps Engineer

Karachi, Pakistan | Aug 2023 - May 2024

- Operated multiple Kubernetes clusters spanning 150+ nodes at Teresol, a vendor supporting Bank AL Habib, handling application deployments and production troubleshooting.
- Automated microservice deployments with Ansible, maintained Docker Swarm applications, and troubleshot workloads using ELK/EFK and Grafana.

Q-Solutions | DevOps Engineer

Karachi, Pakistan | Mar 2023 - Aug 2023

- Built Jenkins CI/CD pipelines, automated deployments with Ansible, and integrated SonarQube and Playwright checks.
- Managed Linux/Windows servers, AWS EC2, RDS, DNS/CDN, and MySQL; deployed Node.js, Next.js, and .NET applications on EC2 and IIS.
- Built Python automation to send Jenkins build notifications to Discord; troubleshot deployment and infrastructure failures.

TrioTech Systems | Automation Engineer

Karachi, Pakistan (Remote) | Feb 2022 - Mar 2023

- Managed a client Amazon EKS cluster and built Jenkins pipelines for delivery to servers and AWS environments.
- Automated AWS provisioning with CloudFormation/CDK and .NET build, Docker image, and ECS deployment workflows using Bash, Batch, and PowerShell.
- Built a Python executable to automate collection of threshold data from a blockchain website and export results to Excel for analysis.

SELECTED PROJECTS

Google Kubernetes Engine | Freelance project

- Deployed a microservices staging environment on an existing GKE cluster, configuring DNS, ingress, and frontend-to-backend connectivity.

OneView | Investment Tracking App & Website

oneviewportfolio.com | Independent product

- Built and launched an investment-tracking app and product website covering stocks, mutual funds, and pension investments.
- Managed domain configuration, hosting, DNS, SSL, deployment, and launch.

EDUCATION

Master of Science, Data Engineering and Information Management
NED University of Engineering and Technology | Feb 2024 - Dec 2025

Bachelor of Science, Computer Software Engineering
Hamdard University | Oct 2018 - Feb 2023
