AHSAN NAWAZ

MULTI-CLOUD & DEVOPS ENGINEER

Karachi, Pakistan | +92 332 888 9799 | productsbyahsan@gmail.com

linkedin.com/in/ahsannz | ahsan2000.github.io/portfolio/

PROFESSIONAL SUMMARY

DevOps engineer with 4+ years of production experience supporting banking systems, cloud infrastructure, and application delivery. Work spans AWS and Azure, with freelance deployment experience on Google Cloud. Operated Kubernetes clusters spanning 150+ nodes, built repeatable release workflows, and implemented disaster recovery infrastructure. Hands-on with Terraform, Ansible, Linux, monitoring, and security checks in CI/CD.

TECHNICAL SKILLS

Cloud infrastructure: AWS, Microsoft Azure, Google Cloud (GCP); EC2, EKS, ECS, S3, RDS, IAM, Route 53; AKS, App Service, VMs, Log Analytics, private networking; GKE (freelance)

Kubernetes & containers: Kubernetes, Docker, Docker Swarm, Helm, NGINX Ingress, MetalLB, Longhorn

Infrastructure & delivery: Terraform, Ansible, AWS CDK, CloudFormation, Jenkins, Bitbucket Pipelines, GitLab, Git, Argo CD; GitOps in staging

Reliability & operations: Linux, Windows Server, DNS, networking, production troubleshooting, disaster recovery, database replication, backup/restore testing

Observability: Prometheus, Grafana, ELK/EFK, centralized logging, dashboards, alerts, Azure Log Analytics

Security & automation: SonarQube, Trivy, pipeline security gates, least-privilege AWS IAM, HTTPS/TLS; Python, Bash, PowerShell, Batch, Playwright

Data & AI platforms: PostgreSQL, MySQL, MongoDB, Redis clusters, KeyDB, Apache Kafka, RabbitMQ; Microsoft Foundry, RAG, Ollama

PROFESSIONAL EXPERIENCE

Bank AL Habib Limited | DevOps Engineer

Karachi, Pakistan | May 2025 - Present

- Designed Kubernetes infrastructure for digital banking microservices, with ELK for centralized logging, RabbitMQ for messaging, and KeyDB for the application backend.
- Designed and deployed the live DigiMate AI chatbot infrastructure on Azure, covering AKS, virtual machines, App Service, MongoDB clusters, Redis clusters, Apache Kafka, Log Analytics, and private networking; isolated banking and chatbot backends and configured HTTPS/TLS.
- Configured retrieval-augmented generation (RAG) and models in Microsoft Foundry for DigiMate; also worked with Ollama in the chatbot project.
- Installed NGINX Ingress, MetalLB, Prometheus, and Longhorn on Kubernetes using Helm. Implemented GitOps delivery in staging with GitLab and Argo CD, synchronizing committed image-tag changes to cluster deployments.
- Implemented a secondary Kubernetes cluster and database replication for disaster recovery; validated application connectivity, login, and transaction flows during failover testing. Configured Prometheus/Grafana dashboards, alerts, and notifications.
- Restored Kubernetes worker connectivity by correcting private-network DNS configuration; mentored colleagues in troubleshooting and resolving technical errors.

PROFESSIONAL EXPERIENCE (CONTINUED)

TekRevol | DevOps Engineer

Karachi, Pakistan | May 2024 - May 2025

- Provisioned client production infrastructure on AWS using Terraform, including EC2 instances, load balancers, and S3 buckets.
- Automated nightly MongoDB/PostgreSQL backups to S3 using cron; restored and validated MongoDB, PostgreSQL, and Amazon RDS backups. Provisioned database servers, created users, and performed migrations.
- Added SonarQube and Trivy security gates to staging pipelines to block vulnerable releases; managed AWS IAM access using least-privilege policies.
- Automated previously manual website releases using Jenkins builds, S3 artifact storage, and Ansible to deploy artifacts and install Node.js dependencies on EC2.

Teresol Pvt. Ltd. | DevOps Engineer

Karachi, Pakistan | Aug 2023 - May 2024

- Operated multiple Kubernetes clusters spanning 150+ nodes at Teresol, a vendor supporting Bank AL Habib, handling application deployments and production troubleshooting.
- Automated microservice deployments with Ansible, maintained Docker Swarm applications, and troubleshot workloads using ELK/EFK and Grafana.

Q-Solutions | DevOps Engineer

Karachi, Pakistan | Mar 2023 - Aug 2023

- Built Jenkins CI/CD pipelines, automated deployments with Ansible, and integrated SonarQube and Playwright checks.
- Managed Linux/Windows servers, AWS EC2, RDS, DNS/CDN, and MySQL; deployed Node.js, Next.js, and .NET applications on EC2 and IIS.
- Built Python automation to send Jenkins build notifications to Discord; troubleshot deployment and infrastructure failures.

TrioTech Systems | Automation Engineer

Karachi, Pakistan (Remote) | Feb 2022 - Mar 2023

- Managed a client Amazon EKS cluster and built Jenkins pipelines for delivery to servers and AWS environments.
- Automated AWS provisioning with CloudFormation/CDK and .NET build, Docker image, and ECS deployment workflows using Bash, Batch, and PowerShell.
- Built a Python executable to collect website threshold data and export it to Excel for analysis.

SELECTED PROJECTS

Google Kubernetes Engine | Freelance project

- Deployed a microservices staging environment on an existing GKE cluster, configuring DNS, ingress, and frontend-to-backend connectivity.

OneView | Independent Investment-Tracking Project

oneviewportfolio.com | Independent product

- Built an investment-tracking app and product website covering stocks, mutual funds, and pension investments; ongoing independent project.
- Configured hosting, DNS, SSL, and deployment for the product website.

EDUCATION

Master of Science, Data Engineering and Information Management
NED University of Engineering and Technology | Feb 2024 - Dec 2025

Bachelor of Science, Computer Software Engineering
Hamdard University | Oct 2018 - Feb 2023
